VINDUINO REMOTE FLOW TRACKING FOR PRECISION IRRIGATION

## DESIGNED BY GROWERS FOR GROWERS
- Remote irrigation volume measurement
- Correct dripper flow rate inaccuracy (+/- 25%)
- Leak & clogging detection
- Designed for eVineyard and eOrchard software
- Rugged, field tested

FEATURES
- Supports pulse output water meters and flow meters
- Reed contact and open collector output interface, up to 375 pulses per second
- Pulse processing front-end for duty cycle tolerance
- Total volume report per time unit
- LoRaWAN encrypted wireless up to 10 mile range
- Solar battery charger, set and forget
- Hinged NEMA 4X waterproof enclosure

Typical application:
